

MODULAR DRAWER CABINETS

Get the highest density storage solution for small to mid-sized products, while reducing your storage footprint by as much as 60%.

High Capacity Storage

Lyon Modular Drawer Cabinets provide you with the highest capacity storage solution. Our 24" and 18" shallow depth cabinets are designed to fit your toughest space constraints allowing you the same flexibility as our standard, 30" deep cabinets.

Precision

Lyon drawer systems feature high-strength steel rails and precision slides with Delrin® rollers. These slides are maintenance free, self lubricating and well suited for rigorous day to day use. Lyon Modular Drawer Cabinets offer full extension, 450 pound capacity drawers.

Delrin® rollers are much better suited for slides compared to steel ball bearings. This highly durable material has properties similar to some metals.

Flexibility

Lyon cabinets are designed around a "Building-Block" approach. Offered in 90 sizes with depths of 30", 24" and 18". This modularity allows for unequalled storage flexibility to grow as your needs do. Side-by-side, back-to-back, or stacked on top of one another, LYON Modular Drawer Cabinets provide flexibility when you need it.
